

INN VITE HOSPITALITY

PO Box 773

New Albany, Ohio 43054

To Whom It May Concern,

Our Red Roof PLUS of Dublin, Ohio had an aging guest internet network that brought constant frustration to our short-term and long-term guests.

We wanted to improve our guest experience, and knew we had to update our technology. Once we researched several companies and communicated with the Red Roof corporate office, we chose ITG Networks to upgrade our network.

It was a relief to work with a company that understands the traditional Red Roof Infrastructure and the unique wiring challenges that it presents. My General Manager, Judy Miller, gave immediate feedback that long term guests were pleased and noticed the upgrade to a Verified Wifi™ solution. I will recommend ITG Networks and their professional staff to all other Red Roof Inn Franchisees.

ITG has been an incredible company to work with, as their crew was professional and courteous. Today, I am able to relax knowing that our front desk can focus on checking in guests and not dealing with internet connection issues.

We couldn't be happier with our choice,

Andy Vasani
President of Invite Hospitality
Red Roof PLUS Franchisee #0127
